

A new project implemented in Alcedar commune, through the Programme of Activities for the Reintegration of the Country for 2024

On January 30, 2025, representatives of the Bureau for Reintegration Policies participated in an event dedicated to the completion of the reconstruction and modernization of the building of the Curățura Health Center, an important facility for the local community, which received financial support from the Government of the Republic of Moldova within the Programme of Activities for Reintegration of the Country for 2024.

The renovation of the building of the Curățura Health Center is an important investment in the medical infrastructure of the local community, which will contribute to improving the working conditions of the medical staff, as well as improving the quality of health services provided to more than 300 residents of the village of Alcedar, including 51 children.

During the event, the Bureau representatives emphasized the importance of this project in the broad context of developing local public services that are essential for protecting citizens' health, and reaffirmed the Government's commitment to investing in healthcare infrastructure.

It should be noted that the settlements of the Șoldănești district, located in the Security Zone, received budgetary allocations for country reintegration activities in the amount of over 6 million lei for the implementation of 36 projects significant for the social development of rural communities.
