

On the occasion of celebrating Entrepreneur's Day

On June 27, 2024, the Republic of Moldova celebrates “Entrepreneur Day” for the first time, a professional holiday promoting the entrepreneurial aspirations of our citizens. This is a good opportunity to celebrate the contributions of entrepreneurs to the development of our communities and the strengthening of the national economy.

In the Transnistrian region, where the constitutional authorities temporarily do not exercise effective control, efforts are focused on implementing measures to ensure equitable conditions for business activity on both banks of the Nistru River and the uniform application of the normative framework of the Republic of Moldova. This approach aims at the economic integration of the region, thus contributing to the restoration of the unique economic area throughout the country.

The registration with the Public Services Agency of all economic agents from the Transnistrian region carrying out external commercial activities and their compliance with the requirements of the current national legislation indicates their interest and commitment to comply with the unique standards applied on the territory of the Republic of Moldova and corresponding to the requirements of the European Union (EU).

The opportunities offered by the Moldovan authorities and the commitments made with Brussels have intensified trade and economic relations with the right bank of the Nistru River and with the EU, stimulated the process of issuing licenses, permits, certificates of origin of goods, bank accounts, etc. to companies in the region by competent national institutions and also had a significant impact on modernization, promotion of quality standards, safety, and welfare. The implementation of almost all commercial operations in the above-mentioned destinations confirms that entrepreneurs in the region are pragmatic, make the right choices and want to act in conditions of legality and competitiveness.

Maintaining competitive, legal, innovative business activities, respecting the principle of loyal competition for the benefit of residents of both banks of the Nistru River makes a significant contribution to the implementation of the process of socio-economic reintegration of the country.
