

Prime Minister at Vienna Economic Forum - Chisinau 2025 meeting

The investment potential in renewable energy, industry, electronics and the pharmaceutical sector of our country was emphasized by Prime Minister Dorin Recean at Vienna Economic Forum, held in Chisinau with the participation of business people from 21 European states. He noted that the business environment in the Republic of Moldova is stable, safe, friendly and competitive.

Recean highlighted that the national objective is to join the European Union. "This path already opens up access not only to the European single market but also to other global markets through the trade agreements that the EU holds. The Republic of Moldova is determined to advance in the reform process," he said.

Recean spoke about the shift towards a digital economy and the evolution of the information technology sector, particularly through MITP, which operates in an attractive fiscal and regulatory regime until 2035. At the same time, the official said that the financial sector in our country is stable and welcomed investments in the insurance sector.

Vienna Economic Forum is a platform that promotes economic cooperation in the Adriatic Sea and Black Sea region. The Republic of Moldova has been a member since 2004, when the organization was founded. This is the fourth edition organized in Chisinau and supports the authorities to expand the foreign investment portfolio in our country.

Chisinau meeting motto - Moldova in focus. Continuing to build economic bridges in challenging times. This year's discussions emphasize three key areas: the economic integration of the Republic of Moldova into the European and global space, infrastructure projects and increasing energy resilience.
