

The Government approved the Program of Activities for the Reintegration of the Country for 2025

At today's meeting, the Government approved the Program of Activities for the Reintegration of the Country for 2025, which provides funding for 30 community development and institutional capacity-building projects to be implemented in localities within the Security Zone. The program also includes partial compensation for farmers from the Dubăsari district who cultivate agricultural land beyond the Râbnîța-Tiraspol Road and are subjected to abusive payments when transporting their harvest through the infrastructure of illegal checkpoints installed by Tiraspol.

The projects included in the Program of Activities for the Reintegration of the Country for 2025 were evaluated and selected by a commission established under Government Order No. 27-d/2025, in accordance with the Regulation approved by Government Decision No. 131/2014.

Central and local public authorities that are beneficiaries of the Program are required to use the allocated financial resources for their intended purpose by the end of the fourth quarter of 2025 and must submit a report to the State Chancellery (Bureau for Reintegration Policies) detailing the implementation results and the impact achieved.

Between 2011 and 2024, a total of 14 government reintegration programs were implemented, providing funding for 586 projects, amounting to over 189 million lei.
