

Prime Minister has meeting with Romanian President

The Romanian side's support for the European path of the Republic of Moldova, joint projects that bring numerous benefits to the citizens, and new opportunities for collaboration between Chişinău and Bucharest were discussed during Prime Minister Alexandru Munteanu's meeting with President of Romania Nicușor Dan.

„The Republic of Moldova and Romania have a special relationship, founded on the indivisible bond between the people on both banks of the Prut. At the same time, Romania has always stood by us, offering confidence and support in our European journey. We have a clear agenda for the next 10 years and the joint commitment to transform the expectations of citizens on both banks of the Prut into concrete results”, said Munteanu.

He thanked Romania for the support provided on all dimensions, emphasizing the potential to increase the number of bilateral projects in the fields of economy, education, and common infrastructure. By 2027, the bridges at Sculeni-Sculeni, Cahul-Oancea, and Leuşeni-Albiţa are set to be modernized. Works on Ungheni-Ungheni bridge are ongoing and we are accelerating the preparation of four more new bridges over the Prut, which will strengthen the connection between the two countries: Costeşti-Stâncă, Leova-Bumbăta, Leca-Fălcium, and Bărboieni-Răducăneni.

Additionally, officials highlighted the importance of energy connectivity projects - work on the Chişinău-Vulcăneşti high-voltage line will be completed by the end of this year, and two more connections are planned for the coming years: Bălţi-Suceava and Străşeni-Gutiinaş.
