

International corporate volunteering programme to be implemented in Moldova

Young specialists from France and the European Economic Area, aged between 18 and 28, will be able to carry out professional internships in Moldova, within the branches of French companies or their partners. The government has approved the Agreement between Moldova and France on the International Corporate Volunteering Programme.

For Moldova, the Programme will provide opportunities for knowledge transfer, exchange of experience through cooperation in mixed teams and support for the development of the local business environment. In addition, the implementation of the Programme will help enhance Moldova's attractiveness for French companies.

During the professional internship missions, participants will receive a residence permit/resident card, with the necessary documents being issued by the institutions of Moldova.
