Another 5104 doses of vaccine against COVID-19 will be delivered to inhabitants in the Transnistrian region

A new batch of vaccines against COVID-19 will be delivered by authorities from Chisinau to the residents on the left bank of the Nistru and in Bender.

Moldovan authorities will hand over to Transnistrian' healthcare centers 5104 doses of anti-Covid vaccines, of which 2004 doses of Pfizer and 3100 doses of Johnson, procured by the Government of the Republic of Moldova.

About 190 thousand doses of vaccine against COVID-19 received by the Republic of Moldova through different humanitarian assistance channels and procured by budgetary sources were proportionally distributed to the inhabitants of the Transnistrian region.

Together with the vaccines, Transnistrian region received various humanitarian items containing personal protecting equipment and modern medical devices for ensuring qualitative services and rapid healing of those infected.

A new humanitarian package is intended to be handed over in the upcoming days to inhabitants from the left bank of Nistru and Bender. It covers 500 thousand single use masks, 240 thousand breathing aid devices and 50 thousand SARS-CoV-2 antigen rapid detection tests.

Chisinau will continue to contribute through all possible mechanisms to the wellbeing and healthcare of inhabitants from the left bank of the Nistru and Bender.
